FORMAL CUSTOMER COMPLAINT NOTIFICATION

Reporting Customer:	Apex Pharma International Ltd.	Date Reported:	16 August 2026
Product Name:	Paracetamol API (Acetaminophen)	Grade / Strength:	USP Grade (99.5% Purity)
Batch / Lot Number:	PA240812	Affected Quantity:	25 kg (1 fiber drum)
Manufacturing Date:	12 August 2026	Expiry Date:	August 2028
Complaint Type:	Foreign Matter / Visible Particulate	Initial Severity:	High / Urgent Triage

1. Detailed Incident Description:

During standard incoming raw material sampling and dispensation at our formulation facility (Suite 4B), our quality control technicians observed multiple visible black particulate matter suspended within the top layer of the 25 kg fiber drum of Paracetamol API (Batch PA240812). The particles appear to be 0.5 mm to 1.2 mm in size with metallic/elastomeric characteristics. Immediate quarantine was placed on drum serial # DRUM-004. No material from this batch has been charged into production. Retention samples and photographic evidence are available upon request.

2. Requested Quality Actions:

1. Immediate investigation into manufacturing line filtration and centrifuge integrity.
2. Provision of a Certificate of Analysis (CoA) and root-cause investigation report.
3. Authorization for return of the compromised 25 kg drum and expedited replacement delivery.

Signed: Dr. Elena Vance, Senior QA Director — Apex Pharma International
